

Methane Abatement Project Manager

We are looking for a Project Manager with experience implementing new technologies for midstream companies. The primary responsibility will be deploying the SlipPure™ methane abatement technology at gas pipeline compressors. As a rapidly growing company, there is potential to assume additional responsibilities. Daphne Technology is a Swiss headquartered company with subsidiaries in the US, Norway and Singapore.

Daphne offers the opportunity to work with a diverse group of talented individuals to deploy cutting-edge GHG-reducing technologies. In this role, your primary responsibility will be to plan and implement our SlipPure™ technology, serving as the 'go-to' person for both customers and Daphne employees. As a fast-growing company, this role will offer opportunities to assume additional responsibilities, enabling you to actively shape your career. Ideal candidates will have experience managing the implementation of new technologies, ideally at midstream companies. A bachelor's degree is required, preferably in Engineering, Project Management, or a related field.

Your responsibilities

Project Planning and Execution:

- Develop and implement comprehensive project plans, including scope, budget, schedule, and resource allocation.
- Coordinate and lead international project teams (that include mechanical and electrical engineers, scientists and technicians), ensuring clear communication and collaboration among stakeholders.
- Monitor project progress, identify potential risks or issues, and implement appropriate mitigation strategies.
- Conduct regular project status meetings, providing updates to the management team and stakeholders.

Stakeholder Management:

- Establish and maintain effective relationships with clients, contractors, vendors, and other project stakeholders.
- Communicate project objectives, deliverables, and timelines to stakeholders, managing expectations throughout the project lifecycle.
- Address any concerns or issues raised by stakeholders promptly and effectively.

Budgeting and Cost Control:

- Develop project budgets and monitor expenditures to ensure adherence to approved budgets.
- Implement cost control measures to optimize project spending without compromising quality or safety.
- Review and approve project invoices, ensuring accurate billing and proper cost allocation.

Risk Management:

- Monitor project risks throughout the project lifecycle and implement contingency plans when necessary.
- Ensure compliance with safety regulations and industry standards to mitigate operational and environmental risks.

Quality Assurance:

- Implement quality control measures to ensure project deliverables meet or exceed industry standards and client expectations.
 - Conduct regular inspections and audits to verify compliance with project specifications and quality requirements.
- Coordinate with relevant teams to address any quality issues and implement corrective actions.

Qualifications

- Bachelor's degree in Engineering, Project Management, or a related field. Advanced degree and/or a Project Management Professional (PMP) certificate is a plus.
- At least 5 years of experience as a Project Manager in the energy industry, overseeing complex projects from initiation to completion. Project Management experience in non-energy industries will be considered with additional experience
- Strong knowledge of project management methodologies and best practices.
- Familiarity with gas pipeline compressor operations, specifically four-stroke lean burn engines. Knowledge of methane abatement reduction technologies is a plus
- Excellent leadership and communication skills, with the ability to effectively collaborate with international cross-functional teams and stakeholders.
- Understanding of safety regulations and environmental considerations in the oil and gas industry.

What we bring to the table:

- Opportunity to work with cutting-edge, GHG-reducing technologies
- Potential to assume additional responsibilities early as Daphne transitions from a mature start-up to a commercial company
- Work with an international, diverse, and multi-disciplinary team of industry-leading experts
