

## Chemical Technician – Production

Join Daphne Technology to be part of our exciting journey to bring a pioneering exhaust gas cleaning system to the market. Daphne leverages innovative technology to remove exhaust gas toxic pollutants and GHG emissions. Work with talented individuals and enjoy a decentralised decision-making structure that empowers everyone to take an active role in shaping the business. Daphne Technology is one of Europe's most innovative climate tech companies. We are now scaling up to drive global growth.

As a **Chemical/ Laboratory Technician who has worked in Chemical Production**, you will have the unique opportunity to be part of a high-functioning team of chemists and material scientists to produce some of the fundamental materials behind our exhaust gas purification technology.

### Your responsibilities

- Conduct syntheses of inorganic materials according to established production protocols.
- Ensure production quotas are met and quality control is maintained.
- Ensure the cleanliness and organisation of the laboratory space.
- Handle and dispose of chemicals and hazardous materials safely and in accordance with safety protocols.
- Assist in performing routine maintenance on laboratory equipment and troubleshoot and resolve equipment issues.
- Prepare samples for analysis and maintain inventory of laboratory supplies.
- Maintain accurate records of all procedures performed.

### Qualifications

- Apprenticeship as chemical laboratory technician (CFC) in a relevant field (e.g., chemistry, materials science, energy science or related industrial sciences).
- Prior experience in a chemical laboratory or similar interdisciplinary setting, with an emphasis on experience in production.
- Knowledge of chemical safety procedures and protocols.
- Excellent attention to detail and accuracy in record-keeping.
- Ability to work collaboratively with others in a team-based environment.
- Strong organisational and time management skills.
- Effective communication and interpersonal skills.

- Ability to work independently and prioritise tasks effectively.
- Excellent written and oral communication skills in English.
- Ability to handle heavy lab equipment and wear chemical masks for extended periods throughout the day.
- Ability to perform repetitive tasks and work under pressure with strict deadlines when necessary.

## What we bring to the table

- An inclusive and engaging work environment
- An international, diverse, and multi-disciplinary team
- A focus on soft skills like collaboration and teamwork
- A focus on empowering our people and enabling them to lead and contribute to their fullest potential
- A pioneering technology with an enormous potential
